

Shared Decision Making Education

Pathway of Patients/Caretakers Making Informed Decisions

PRESENTER:
Wooten, Bonnie

Purpose

To be proactive and provide education sessions to patients and caretakers who are at high likelihood of having multiple and challenging health care decisions.

Methods

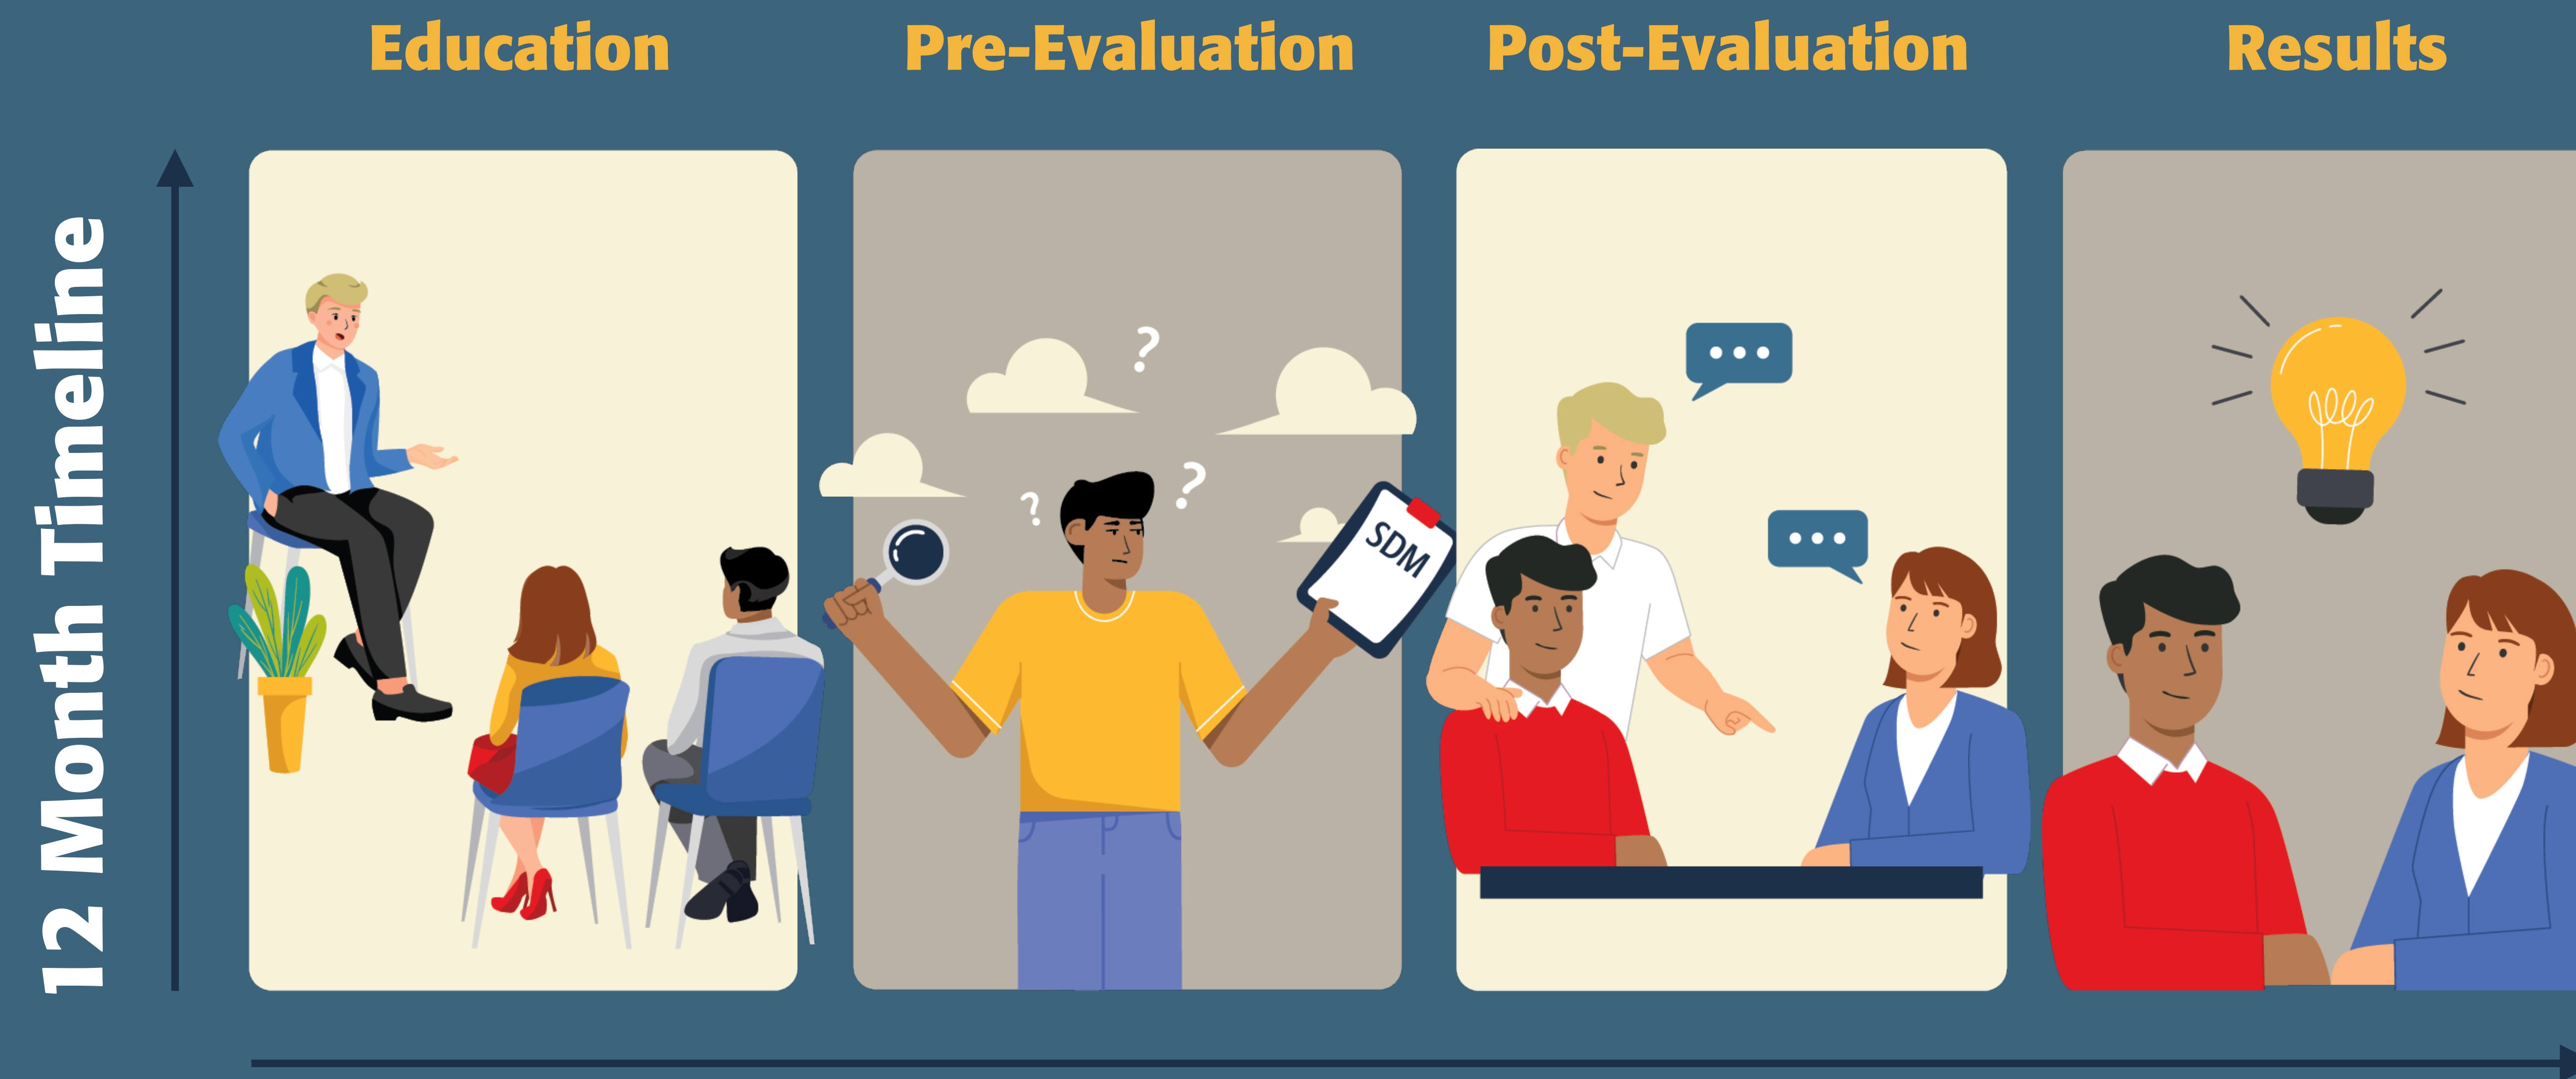

Virtually remote access to patients and caretakers from “clinic to home” via:

- Monthly webinars
- Bi-weekly phone chat lines
- Weekly clinics
- Inpatients
- Decision coaching
- Community education

Results

A knowledge translation proactive approach empowers patients and caretakers to navigate decision making in a health care system.

Pathway for Shared Decision Making Education and Training of Patients/Caretakers Making Informed Decisions

728 Families and Caretakers Engaged

Scan for more information and video

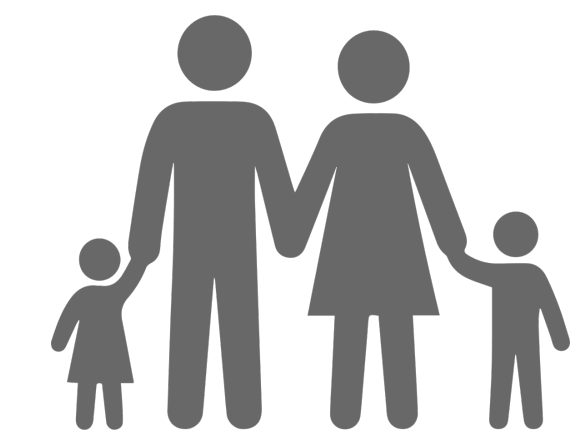

Outcomes

Greater attention to health literacy and socially-disadvantaged populations

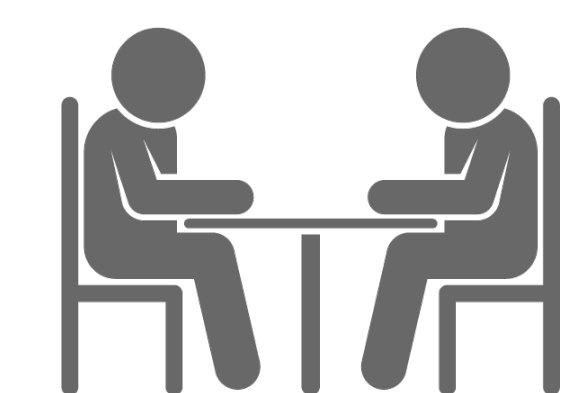

Be proactive

Engage the families and caretakers in decision-making

Stop information overload

Invest in unhurried and undistracted conversations

Acknowledgments
