

**99.2%**  
**OF ADOLESCENTS AND  
YOUNG ADULTS SEEN  
IN THE SICKKIDS  
CARDIAC TRANSITION  
PROGRAM WERE  
SATISFIED WITH  
THEIR EXPERIENCE.**

### Background

Patient satisfaction with the SickKids cardiac transition program was examined as a key indicator of success.

### Methods

- 14 - 17 years old
- Congenital heart disease diagnosis

- 25-item survey
- Online (REDCap)
- Optional
- Anonymous

### Patient Partnership & Implications

As active participants in the cardiac transition program, patient feedback is critical to achieving optimal engagement and improving the program.

What did you like the **MOST** about the transition education appointment?

#### Program Structure

- 1:1 delivery, easy to follow, safe environment, opportunities for questions

#### Program Content

- Informative, specific, cardiac diagrams, encouraged independence

What did you like the **LEAST** about the transition education appointment?

- Learning that it is time to leave SickKids
- Appointments are too long
- Too much information
- Learning about being independent
