BC Guidelines: Clinical Practice Guidelines to Support Primary Care in BC

Sandra Lee MD CCFP FCFP, Douglas McTaggart B.Comm. MD, Katey Townsend MSc, Fritha Munday MPH, and the BC Guidelines Team

What makes BC Guidelines unique?
- Specific for primary care practitioners
- Developed by BC practitioners: family physicians, specialists, nurse practitioners, pharmacists, other relevant health care providers
- Medical Services Plan (MSP) billing rules
- Lab test availability and lab utilization
- PharmaCare coverage
- Links to local BC resources, including rural and remote
- Promotes appropriate utilization of BC resources
- Address current clinical issues and priorities in BC: Opioid Overdose Response, Appropriate Imaging Framework, Chronic Pain Strategy, GPSC fee incentives

How are BC Guidelines implemented?
Collaboration with our partners
- Requisition Committee
- Medical Imaging Advisory Committee
- Shared Care Committee
- BC’s Agency for Pathology and Laboratory Medicine
